# BLITT

The international partners of the BLITT project met for the last partner meeting in Reus, Spain.
We are only three months away from the end of the project, and in the meantime we have some activities to look forward to, most of all the closing events.

## PILOTING WORKSHOPS

Over the past months, partners have been implementing the piloting courses after the completion of the LTTA Activity in Piraeus. The piloting workshops started from August of 2023 with an aim of disseminating the main results from the LTTA lessons, which were focused on the basic steps of transforming traditional education methods into a blended learning delivery.

Among the participants were PhD students, teachers in formal and non-formal education, as well as trainers.

## Upcoming

After the conclusion of the piloting workshops, all partners will be implementing their own Multiplier events on a national level, which will be taking place in March 2024.

**Are you looking forward for the results? Stay tuned through our website:**
