

BLITT

About the project

“Blended learning Train-the-Trainer” (BLITT) is an Erasmus+ project that provides a strategic approach to continuous training of adult educators in the field of blended learning.

Adult educators usually rely on a self-initiative when it comes to blended learning in their teaching. With the transformation introduced by COVID19, blended learning has become a priority for teachers.

The project will implement the following activities:

- A collection of blended learning case studies
- A train-the-trainer course that adult educators will attend to become "blended learning champions".

PARTNERS

COLLECTION OF CASE STUDIES

Trainers started writing a **Transformation plan** to organize the hours they'd need to blended learning. During this learning process, trainers had to keep a **Journal**, communicating their experiences before and after each teaching hour. Concluding this journey, teachers will be called to compose a **Case study** assessing and reviewing their experience and its results.

TPM in Cyprus

The 2nd Transnational Project Meeting was held last November in Nicosia, Cyprus. Partners discussed about the progress of the **Bridging course** and the development of the **Transformation plan and Journal** for the trainers.

Upcoming

After the conclusion of the Transformation plan/Journal/Case studies, all trainers will participate in the **Training Activity**, carried out in **Greece**, on **May 2023**.

Are you looking forward for the results? Stay tuned through our website:
